Report of Prof. P.M Chikkaboraiah Memorial One Day National Seminar on 'Evolving Trends in Intellectual Property Rights & Contemporary Challenges' held on January 4th 2025

The IQAC of our college has organised **Prof. P.M Chikkaboraiah Memorial 'One Day National Seminar on Evolving Trends in Intellectual Property Rights & Contemporary Challenges'** held on 04-01-2025 at Prof. P. M. Chikkaboraiah Seminar Hall of our college. The seminar programme has started with invocation song which was sung by miss. Student of our college. Dr. Deepu. P, has welcomed all the dignitaries of the programme and also introduced the Hon'ble Mr. Justice. Ramachandra. D. Huddar, Hon'ble Judge, High Court of Karnataka, Bengaluru, and Prof. (Dr.) Sreenivasulu. N.S, Prof of Law, National University of Juridical Science (NUJS), Kolkata, West Bengal. Sri. Mohankumar, Assistant Professor of Political Science, has rendered the briefly introduction about Prof. P.M, Chikkaboraiah. This programme has been presided by Sri. Gundappa Gowda, Hon'ble President, Vidyavardhaka Sangha, Mysuru. The programme has inaugurated by Hon'ble Mr. Justice. Ramachandra. D. Huddar, Hon'ble Judge, High Court of Karnataka, Bengaluru, with all other dignitaries of the programme and all the dignitaries poured the flower pellets to portrait of Prof. P. M. Chikkaboraiah as token of respect.

While delivering the inaugural address, Hon'ble Mr. Justice. Ramachandra. D. Huddar, has said that the present day science and technology across the world rapidly been developing and awareness about law relating to intellectual property law is essential and especially law students should learn and update their knowledge relating to intellectual property laws. All intellectual creations at ancient society have been carefully protected because such intellectual creations are part of their business in day today routine and hence recognised through patent as well as copyright as it was very essential in the interest of creators. Even in china, a particular invented article or a thing used to recognise either in the name of emperor or in the name of creator and some of the products, articles or things have their own marks and during 14th and 15th century use of logo evolves along with marks. Now a day's laws are also evolving on artificial intelligence and as per the legal scholars intellectual properties are recognised as nation's new properties. Now a day's majority of the people uses mobile as device which has artificial intelligence but this generation has been losing their sense of words and knowledge and they believing what they see and hear through such devises. Due to development of science and technology cybercrimes are also rampantly been increasing in all the society. Recently, the Bangalore, the capital city of Karnataka, has been witnessed 60percent of cybercrimes, hence the smart phone devises which has artificial intelligence has to be used with great care and conscious caution and then only we can avoid cybercrimes.

Prof. (Dr.) Sreenivasulu. N.S Prof of Law, National University of Juridical Science (NUJS), Kolkata, West Bengal, while delivering the Key note address, expressed the importance of intellectual property and significance of intellectual property rights. The scope of intellectual property has rapidly been expanding as the development of science and technology along with artificial intelligence. The creative innovations or inventive activities of human's results with useful inventions at all sectors and governed by intellectual property laws. In the domain of knowledge we can differentiate the intellectual property from the point of view of creator of intellectual property and not from the point of common man. We all as human being, wherever we may go and even if we know or do not know, we all have been observed by things or devices which are created as intellectual property. The practice of recognising the intellectual creativity of a creator, incentivising of such creativity, conferring the rights and providing protection through intellectual property law will boost the innovative minds to invest their intellectual labour into innovative field.

There are various inventive fields like applied science, bioscience, robotic science, space science, artificial intelligence, nano-technology, biochemistry, bioscience, biotechnology, pharmaceutical industries, advance technology, website and domain name, industrial design, automobile industry contains more challenges which need to be encountered. Pharmaceutical industry as well as space technology demands more and more creative inventions. Other sector like education sector, service sector, banking sector, entertainment sector, agricultural sector, business sector, and industrial sector also demands advanced devises of artificial intelligence. Robotic machines with artificial intelligence have a kind of a creative mind like a human mind which have already at human service and some countries have already provided status like citizen to those artificial intelligence robotic machines and these machines will work similar to work as if had done by human being like playing the musical instruments, composing the music, singing, depicting famous celebrities pictures, reading, analysing, problem solving, accumulation, compilation and analysing of data etc. While doing these tasks they creates different versions of problems which need to addressed. Suppose if AI creates story or musical works than who shall claims authorship and who shall climes ownership, whether AI or a person who creates AI all these questions needs to tackled through appropriate legal framework and hence legal sector requires law graduates who are specially empowered with intellectual property laws.

Sri. Gundappa Gowda, Hon'ble President, Vidyavardhaka Sangha (R), Mysuru, has delivered the presidential address. Sri. Shrishaila Ramannavar, Hon'ble Treasurer, Vidyavardhaka Sangha (R.), Mysuru has gracious the occasion as guest of honors, Er. S. Shivalingaiah, Chairman, CMC, VVLC, Mysuru, has also gracious the occasion as guest of honors. the governing council members of Vidyavardhaka Sangha and family members of Prof. P. M Chikkaboraiah, teaching and non-teaching members, research scholars, paper presenters, faculty members and students of different law colleges, advocates and media persons were also gracious the programme and Smt. Indumathi. M.J, anchored the programme. Dr. Kumara. N.J, Coordinator, Dr. Boregowda. S.B and Dr. Prarkruthi. A.R, assistant coordinator and more than 300 students of our college were attended the programme and the programme was thought-provoking, fruitful and meaningful.

The programme has inaugurated by Hon'ble Mr. Justice. Ramachandra. D. Huddar, Hon'ble Judge, High Court of Karnataka, Bengaluru, with all other dignitaries.
