Introduction

Forests, pillars of global food security and nutrition, are the livelihoods of millions of families. They provide essential foods such as fruits, seeds, roots and wild meat, fundamental resources for indigenous and rural communities. But its function goes far beyond. Forests are a vital source of energy, providing wood for cooking, playing a key role in agriculture by hosting pollinators and acting in soil enrichment, climate regulation and biodiversity conservation. In 2025, "Forest and Food" is the theme for the day, celebrating the crucial roles of forests in food security, nutrition and livelihoods. In addition to providing food, fuel, income and employment, forests support soil fertility, protect water resources, and offer habitats for biodiversity, including vital pollinators.

Celebration at VVLC

To raise awareness among students and staff, VVLC took the initiative to celebrate World Forest Day with an innovative approach that actively involved both groups. The event was presided over by the Principal, Dr. Deepu P, who addressed the students on the importance of forests and their deeprooted connection with various aspects of human life, in line with the contemporary theme. She emphasized that food, as a fundamental necessity for all living beings, is a direct outcome of a thriving forest ecosystem. She further highlighted the need to protect forests from excessive industrialization to ensure sustainable development and uphold intergenerational equity.
